

RACE for 2030 Consumer Grid Summit 2026

Sydney, June 24-25

The Consumer Grid Summit is an Australian-first initiative designed to bring together current and emerging leaders from across the energy system to move beyond discussion and into action. By convening a deliberately diverse group spanning government, regulators, networks, retailers, consumer advocates, technology providers and research institutions, the Summit creates a space to work through shared challenges, align perspectives, and identify practical pathways toward a more consumer-focused, equitable and future-ready energy system.

Organisations attending		
AEMC	ENA	Regulatory Assistance Project
